

Stay tuned for future i-Ready updates.

Mastery assessment window is February 20-24

How to leverage data after the mid year diagnostics
This information is available at iReady Central. Click [HERE](#)

6th Math: Lessons: 9-10
(6.NS.3)

7th Math: Lessons 12-14
(7.RP.3, 7.EE.1)

8th Math: Lessons 11-13
(8.EE.5, 8.EE.7b)

making mistakes

- When you make little errors in front of your students, how do you react?
- Can you think of a time you made a mistake with a lesson, or in teaching a unit? What did you learn?
- What experiences help us reflect on our own beliefs about how students learn mathematics?

Blogger Mark Chubb shares 3 mistakes and offers his reflections on making mistakes in the classroom. You can read (and reflect) [HERE](#)

quick PD

The Teaching Channel offers a video, "My Favorite No", in which a math teacher uses a quick, low-prep strategy as a daily warm up. It is a great formative assessment strategy that actually celebrates the mistakes students make by turning them into opportunities for reteaching and intervention. Watch Ms. Alcala [HERE](#) and consider how you might weave this strategy into your daily routine. How empowering would it be for a student to hear, "This is a really great mistake."

Remember to contact any one of your math IFs, Stacy Wozny, Barbara Hill or Cindy Farmer. We are always willing to offer any support we can.
